Soft Skill

- Teamwork
- Remote work
- Self-motivation
- Problem Solving
- Proactive

Interests

- Pencil Sketching
- Reading History
- Travelling

About Me

A full stack developer with hands on using ReactJS and CSS at the front end, NodeJS, and Express at the backend building web applications. Aiming to be an integral part of an organization where I can apply my skills to make valuable contributions to its growth.

Projects

Royal Brothers Clone

Built a bike rental portal where the user could select the source and destination cities and book a ride.
Team size. : 4
Tech stack :   HTML, CSS, Reactjs, ChakraUI, Nodejs, Mongodb and Javascript.

Key Responsibilities:-
- Designed and implemented a landing page, home page, and Navigation bar at the front end.
- Implemented crud operations, and user authentication at the backend.

Spotify clone Website

Made a website similar to Spotify which is one of the world's most popular online music listening platforms.
Team Size : 5
Tech stack : HTML, CCSS, ES6, Javascript, and Local storage.

Key Responsibilities :-
- Designed Home page, and navigation bar at the front end.
- Implemented complete responsive web pages.
- Used the Spotify rest APIs to populate data.

My Quiz app

Created a website where users can select a number of different types of quizzes like technical, games, sports, etc then access/play the entire quiz and check their scorecard.
Tech stack :   Html, CSS, Reactjs, ChakraUI, Nodejs, Javascript and Mongodb.

Key Responsibilities:-
- Designed and implemented the entire front end.
- Handled the user authentication.
- Used MongoDB to store the user data using the express.js in backend.

Training and Certifications

Learn Vern:- Programming basics C++, Java and Internet of Things (IOT)

Workshops:- **Artificial intelligence and Future:** Learnt about various use cases of AI ranging from autonomous vehicles, robotics, natural language processing and speech recognition.
